

## OUR PHILOSOPHY

Magnificare is committed to continuous quality improvement and adherence to ethical care standards. Our philosophy emphasizes:

- Evidence-informed caregiving practices
- Respect for individuality and personal values
- Promotion of independence and functional capacity
- Emotional and psychosocial well-being
- Collaboration with families and care teams
- Ongoing evaluation and improvement of service delivery

## OUR CAREGIVERS

Our caregivers are carefully selected and trained to meet high professional standards.

All caregivers:

- Undergo background screening and reference verification
- Receive role-specific training and ongoing education
- Are bonded, insured, and covered by Workers' Compensation
- Are supervised to ensure quality, consistency, and compliance

We prioritize reliability, professionalism, and compassionate engagement.

## WHY CHOOSE MAGNIFICARE HOME CARE?

**Magnificare Home Care** is a licensed, values-driven home care organization delivering **person-centered, evidence-informed non-medical care** designed to support safety, functional independence, and quality of life for older adults and individuals with chronic conditions.

Our care model is grounded in **gerontological best practices**, emphasizing aging in place, continuity of care, and individualized support plans that align with clinical recommendations and family goals.

Research in gerontology and aging sciences demonstrates that individualized home-based support:

- Enhances cognitive, emotional, and psychosocial outcomes
- Reduces fall risk and preventable hospitalizations
- Improves medication adherence and nutritional status
- Supports caregiver sustainability and reduces burnout

Magnificare integrates these principles into every care plan.

## Your Trusted Care Team

- Care for Veterans
- Respite Care
- Personal Care
- Companionship
- Transportation
- Case Management
- Family Support Services

## OUR APPROACH

### Step 1: Initial Consultation

Clients or referral partners may contact Magnificare for an initial consultation to review care needs, safety concerns, and support options. We provide **24/7 on-call availability** for urgent support coordination.

### Step 2: Comprehensive Care Assessment (No Cost)

A structured, non-medical care assessment is conducted to evaluate:

- Activities of Daily Living (ADLs)
- Instrumental Activities of Daily Living (IADLs)
- Mobility and fall risk factors
- Nutritional needs and meal support
- Cognitive status and supervision requirements
- Psychosocial well-being and social engagement
- Home environment and safety considerations

Findings are documented and used to develop an individualized care plan.

### Step 3: Individualized Care Plan Development

Care plans are customized based on assessment outcomes, client preferences, and family input.

Caregiver matching considers:

- Required competencies and experience
- Communication style and interpersonal compatibility
- Schedule continuity to promote relationship stability

### Step 4: Ongoing Monitoring & Plan Adjustment

Care plans are reviewed and modified as needs evolve. Services can be increased, reduced, or discontinued at any time without long-term obligation.
